SmartStacks AI Website

Official website for SmartStacks AI - helping businesses build once and automate the rest.

About This Repository

This repository contains the source code for the SmartStacks AI website, a React-based site showcasing automation solutions, products, and services designed to help businesses streamline their operations.

Website Features

- Modern, responsive design with teal and gold branding
- Product showcase with e-commerce capabilities
- Blog section for content marketing
- Tools recommendation section for affiliate marketing
- Contact page with booking calendar integration
- Newsletter signup for lead generation

Live Website

The website is currently deployed at: https://iueqsoap.manus.space

Editing the Website

To make changes to the website:

1. Clone this repository to your local machine
2. Navigate to the project directory
3. Install dependencies with `npm install`
4. Make your desired changes to the files in the `src` directory
5. Test your changes locally with `npm run dev`
6. Build the production version with `npm run build`
7. Deploy the contents of the `dist` directory

For detailed editing instructions, please refer to the editing_guide.md file in this repository.

File Structure

- `/src/pages/` - Individual page components
- `/src/components/` - Reusable components (header, footer, etc.)
- `/public/images/` - Image assets
- `/dist/` - Production build files
